

Before Indiana enacted the no call list, I put a message on our answering machine saying for telemarketers to remove me. That did NOT work. Since we have our name on this list and it states it on our recorder, we now enjoy being home, eating supper, and not being bothered with these rude people. I have been cussed by telemarketers in my own home. I didn't call them, they called me. Please don't change OUR law. Thank you very much for letting me state my opinion.
